Adél Léna Roszkopf

BSc Computer Science Student | Interested in Full-Stack
Development & Data Science
Budapest Metropolitan Area

Összefoglalás

Motivated junior software developer with a strong foundation in full-stack development, practical experience in both Java and React, and a passion for building clean, testable, user-centered applications. Completed international Erasmus+ mobility program and developed a full-stack thesis project involving Laravel, React, and Docker. Eager to apply and expand knowledge in a dynamic, team-oriented environment.

Szakmai tapasztalat

Creative Finance

Intern

March 2025 - March 2025 (1 hónap)

Ghent, Flemish Region, Belgium

Software Developer Intern (Erasmus+ Program)

- Collaborated with an international team to develop a web-based invoicing application integrated with the Peppol e-invoicing network.
- Contributed to both front-end and back-end development tasks while ensuring the solution complied with European e-invoicing standards.
- Strengthened teamwork and cross-cultural communication skills by working in a dynamic, multicultural environment.

Capture Group

Intern

September 2024 - February 2025 (6 hónap)

Budapest, Hungary

- Develop detailed and structured test cases to ensure software quality and functionality.
- Create comprehensive guides and step-by-step instructions to assist team members in executing tests effectively.
- Collaborate with the development team to identify and document potential issues, contributing to continuous improvement in the testing process.
